The economic solution for the printing press

Web viewing systems are a standard in the converting and label industry. They are used on almost every printing press for monitoring registration, overall print quality and accuracy, and color. The down side of in-line 100% inspection systems so far has been the heavy investment, which many printers have avoided, thereby compromising quality assurance.

The new patented **TubeScan eagle view** is now bringing both worlds together: Multiple cameras are combined in the same housing to offer detailed viewing and 100% inspection at the same time. The intuitive touch screen interface makes setup extremely simple and fast.

Full web view and detail viewing down to dot matrix level

Your benefits

- ▲ Cost-efficient combination of 100 % print inspection and detail viewing
- ▲ Detail viewing of critical areas like registration marks, 2d barcodes, picture areas, etc. down to dot level
- ▲ Camera for detail viewing is motorized and can be easily navigated with respect to the displayed print repeat
- ▲ Switchable UV illumination (365 nm)
- ▲ No print mark sensor or gear sensor required for synchronization
- ▲ The optional back light enables monitoring of the back print register
- ▲ Small foot print, only requires 125 mm (5") in web direction
- ▲ Can be combined with all options available for **TubeScan digital strobe** such as fine print inspection, PDF reporting, dynamic roll map, etc.

Technical data

Basic features and web widths: → see pages 2–5

Resolution of detail viewing (motorized camera)	< 30 μm
View area of detail camera	35 mm × 25 mm (1.4" × 1") 1600 px × 1200 px
Image rate of detail camera	< 10 images/second
Maximum speed	250 m/min (820 ft/min)
Automatic image synchronization within the repeat	
Picture-in-picture navigation via touch monitor	

TubeScan models	Length of housing
<i>eagle view</i> 180	410 mm (16.1")
<i>eagle view</i> 250	410 mm (16.1")
<i>eagle view</i> 370	510 mm (20.1")
<i>eagle view</i> 470	610 mm (24.0")
<i>eagle view</i> 550	760 mm (29.9")
<i>eagle view</i> 660	840 mm (33.0")

Intelligent print inspection

Introducing 100% print inspection that has never been as simple and cost-efficient as offered by the TubeScan product series.

From simple 100% web monitoring, detection of missing labels and matrix residues to high resolution 100% print inspection within a workflow – now you are able to realize all your needs with one modular system.

Performance characteristics

- ▲ Can take and display up to 30 images per second in live mode – seamless monitoring of every repeat in real time
- ▲ Maximum speed range: 150m/min – 500m/min (450ft/min – 1500ft/min) – depending on the model
- ▲ Maximum web width: 180mm – 850mm (7" – 44") – depending on the model
- ▲ Various camera models available up to 4k resolution
- ▲ Optical resolution starting from 55 µm

UV inspection for luminescent applications

- ▲ Switch between standard white light inspection and UV inspection
- ▲ Inspect luminescent areas such as coatings, adhesives, silicones
- ▲ Inspect features printed with UV and fluorescent inks

→ Security print

Transparent labels on transparent or opaque liners

- ▲ Use the special contour light to create an image contrast when producing transparent labels on clear or even white paper liners
- ▲ Detect almost invisible missing labels and matrix residues, especially on blank labels
- ▲ Switch between standard white light inspection and contour light inspection

→ Clear-on-clear

→ Clear-on-paper

→ Sleeves/tubes

Barcodes, OCR

- ▲ Static and dynamic inspection of 2D / 3D barcodes
- ▲ Static and dynamic evaluation of alphanumeric sequences (OCR)

Standard features of all models

- ▲ 100% web viewing during make-ready and production
- ▲ Superb image quality due to high camera resolution
- ▲ Automatic repeat synchronization across the entire speed range of the machine
- ▲ No health risk, less tiring compared to conventional monitoring using strobe lights
- ▲ Fast and easy job setup
- ▲ Very reliable and stable operation
- ▲ Cost-efficient

Further options (see also page 7)

- ▲ 100% print inspection
- ▲ Secondary inspection zones for individual tolerances
- ▲ Automatic label contour detection
- ▲ Masking function to ignore definable areas
- ▲ Surface inspection
- ▲ Relative distance monitoring
- ▲ Placement control for rewinders
- ▲ Generation of PDF roll reports
- ▲ Switchable UV-illumination (wavelength 365 nm)
- ▲ Inspection workflow QLink
- ▲ Dynamic barcodes and OCR
- ▲ PDF Toolbox

Pinhole detection

- ▲ Detect tiniest pinholes in aluminum foil and other opaque webs
- ▲ Switch between direct white light illumination for standard print inspection and back light illumination for pinhole detection

- Aluminum lids
- Blister packs

Distance monitoring/position monitoring

- ▲ Monitor the distance between die-line and print
- ▲ Monitor the position of printed objects
- Die-cutting
- Slitting
- Embossing

Inspection of highly reflective materials

- ▲ Use the adjustable backing bar (with optional idler rolls) for bright-field or dark-field inspection
- Cold foil / hot foil applications
- Holograms
- Coatings

System overview

Backing bar

Adjustable backing bar for liner-based materials

Adjustable roller backing bar for sensitive materials without liners

Back light illumination

The backing bar can be equipped with integrated back light illumination

- ▲ Option A using a light line with high intensity
 - Pinhole detection
 - Buried antennae structures in RFIDs
 - Equalization of textured surfaces such as Tyvek®

- ▲ Option B using an area light for the detail camera of the **TubeScan eagle view**
 - Monitoring of the back print register
 - Equalization of textured surfaces such as Tyvek®

Dimensions

Cross section
(Width of housing depends
on web width)

Mounting

Cantilever mount,
for housings up to
510 mm of length

Front
mounting
brackets

Customized
double-sided
mounting

Technical data for all TubeScan systems

Web width in mm	180	250	330	430	550	660	760	850
Web width in inch	7	10	13	17	22	26	30	34
Touch monitor	minimum 15"							
HD monitor	minimum 22" (other sizes upon request)							
Image rate	up to 30 images per second							
Maximum lateral web movement	± 10 mm							
Automatic image synchronization	yes							
Operating temperature	0° – +35°C (+32° – +95°F)							
Supply voltage	100 V - 240 V, 50 - 60 Hz							
Shaft encoder with layon wheel	RS422 channel A+B							
10 opto-isolated outputs 24 V, 80 mA max.	DefectFound, InspectionActive, SlowDown, FinalStop, ...
